**LETTER OF DEFICIENCY
WET #SC2003-0014**

September 17, 2003

Robinson Family Trust
Attn: Joe Caldarola
170 Dennett Road
Portsmouth, New Hampshire 03801

**RE: Wetlands Bureau File #2003-1081, Robinson Family Trust, 170 Dennett Road,
Portsmouth Tax Map U43 / Lot 1.**

Dear Mr. Caldarola:

On July 1, 2003, the Department of Environmental Services ("DES") approved a wetlands permit to dredge 2,000 sq. ft. of non-tidal wetlands to increase the water depth and remove existing Purple Loosestrife (*Lythrum salicaria*) on your property. On August 27, 2003 and September 16, 2003, personnel from the Department of Environmental Services ("DES") conducted an inspection of the above referenced property (the "Property"). The purpose of the inspection was to determine compliance with RSA 482-A, the New Hampshire Wetlands Law.

DES personnel determined that dredging and filling of approximately 5,000 sq. ft. of freshwater wetlands took place on the property beyond what was originally approved in the NHDES Wetlands Permit #2003-1081 from the DES Wetlands Bureau.

DES requests that you take the following action:

1. Retain a qualified wetland consultant to generate a plan which depicts existing conditions showing the topography of the property, and quantifies by field survey the current extent of disturbance in jurisdictional wetlands, and a restoration plan, as described below.
2. Submit both the existing conditions plan, and a restoration plan no later than October 17, 2003 for review and approval including:
 - a. A plan with dimensions for the restoration of a total of approximately 5,000 sq. ft. of unpermitted dredging and filling in freshwater wetlands.
 - b. Planting plan for the stabilization of the restoration areas;
 - c. Equipment and methods of erosion control (silt fence, hay bales, etc.);
 - d. Construction sequence and timetable for accomplishing remediation no later than November 17, 2003.
3. Retain a qualified wetland consultant to supervise and execute the requests of this letter.

NHDES Wetlands Complaint File #2003-1081

September 17, 2003

4. Execute the restoration plan immediately upon receipt of the restoration plan approval from the DES Wetlands Bureau.

RSA 482-A, the New Hampshire Wetlands law, was enacted to protect and preserve wetlands and surface waters from unregulated despoliation. Prior to dredging or filling in and adjacent to wetlands or surface waters, an individual is required to obtain a permit from the Wetlands Bureau. If work is done without a permit from the Wetlands Bureau, this is considered a violation of RSA 482-A. Failure to respond to this Letter of Deficiency in a timely and complete manner may be construed as noncompliance by the receiving party.

Issuance of this letter shall not preclude further enforcement by DES. Failure to comply with RSA 482-A will result in enforcement by DES, including but not limited to the issuance of fines, administrative orders, or referral to the New Hampshire Office of the Attorney General for prosecution of civil or criminal penalties. If an order is issued to you, it may also be recorded with the Registry of Deeds as an encumbrance against your property.

All documents submitted in response to this Letter of Deficiency should be addressed as follows:

David Price, Compliance Investigator
Wetlands Bureau
Department of Environmental Services
360 Corporate Drive
Suite 2
Portsmouth, NH 03801

Should you have any questions regarding this letter, or wish to arrange a meeting, please contact me at (603) 433-6183.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dori Wiggin', is written over the word 'COPY'.

Dori Wiggin
Coastal Supervisor
